JAYDEN KASHANI MALEKI

SKILLS

Mathematics, Software Development, Python

I am Jayden Kashani Maleki, a 21-year-old student Artificial Intelligence at the Vrije Universiteit Amsterdam. I enjoy studying AI concepts, and working out problems to try and solve them, since I have a passion for math. Besides studying, I also work (part-time) as a software engineer. I mainly build APIs to enhance infrastructure within the company I work for.

EXPERIENCE

Developer | Kompas Publishing | January 2024 - Present

Development of APIs to generate outputs from existing data. Enrichment of internal tools with automated insights. Primarily work with Python, and code reviews. Design of scalable API architectures to integrate with publishing workflows.

EDUCATION

BSc Artificial Intelligence | 2026 (?) | Vrij Universiteit

The study of Artificial Intelligence, where most focus lies on research, and studying mathematical concepts and theories (ML, probability, linear algebra, calculus).

BSc Applied Mathematics | Not Completed | TU Delft

Study where a deep understanding of mathematical concepts is laid.

VWO | 2022 | Kennemer College

Studied mainly mathematics, physics, and chemistry. N&T (Nature & Technology)
